TIMELINE/CALENDAR

A timeline/calendar is a chronological layout of objectives and/or units over your program's week/month duration.

LEARNING CHECKPOINTS

Learning checkpoints are evaluations showing student progress. Examples include tests, quizzes, unit reviews, labs, projects, demonstrations of skill mastery, etc. Your chosen checkpoints need to be listed throughout the curriculum timeline.

LEARNING OBJECTIVES

Learning objectives are statements that identify what your students will know and/or be able to do by the end of each unit and/or training program. To note: this is not a list of topics, vocabulary terms, or a single comprehensive course summary.
